## APPLICATION FOR WATER SERVICE PLAN REVIEW FOR COMMERCIAL/INDUSTRIAL APPLICANTS

Property Owner Name: \_\_\_\_\_

Property Owner Billing Address: \_\_\_\_\_

Address of New Service: \_\_\_\_\_

Property Owner Phone #: \_\_\_\_\_ Email: \_\_\_\_\_

New Service to property                       Modification of Existing Service to property

Applicant must submit water system installation construction & interior plumbing plans to WWC for approval. Plans to be submitted/approved prior to Building Permit approval. Plans must show at a minimum:

- Location of water services and fire services (if fire services are req'd)
- Size of water services and fire services
- Location of shut off valves for each service
- Materials used in each service
- Details of water service connection, trench cross section, shut off valves
- If existing service is abandoned, then plans must show termination of existing service at corporation
- Water service installation must be in compliance with WWC Rules and Regulations (WWC Website)
- All water services to be inspected by WWC prior to backfill. Hydrostatic water testing of water service may be required by WWC.
- Location and size of water meter and check valve (meter size determined by required peak instantaneous flow in gpm which is based on fixture count)
- If fire service is being installed, location of backflow device installed on fire service (DCDA Req'd)
- Location of all other backflow prevention devices in the building (plumbing plans). A WWC Backflow Prevention Device Design Data Sheet is required to be completed and submitted for each device (application can be found under Cross Conn Tab at WWC website).
